

HAFIZ M.SAJID

ReactJs/Dot.Net MVC

Objective

To work in a competitive and challenging environment to contribute to the best of my abilities towards the growth and development of a progressive organization. To fully utilize my interpersonal and academic skills, extend my current knowledge about computers, and experiment with new technologies in software, to pursue a challenging and rewarding career as a Full Stack Web Developer.

Working together with clients to achieve a common goal is what I believe in and that's what keeps me motivated.

EXPERIENCE

W GROUP — Intern(ReactJs)/Junior Frontend Developer

february 2022 - May 2022

W-Group is a product-based company with a product called Wooo. I worked on this product as a Junior Frontend Developer.

ZETA ENTERPRISES, Lahore — Junior Asp.Net(MVC)Developer

October 2022 - Feb 2024

I worked at Zeeta, a service-based company, where I contributed to the development of POS and ERP systems. My role involved working on the front-end as well as utilizing ASP.NET MVC for the back-end.

EDUCATION

The University Of The Punjab — MCS

September 2018 - September 2020

Modules studied include Software Engineering, Algorithms, Computer Graphics, Technical & Business Communication, Advanced Programming, Artificial Intelligence and Web Development

The Islamia University Bahawalpur — BSC

August 2016 - August 2018

I have done intermediate with major as Computer and Maths

RECENT PROJECTS THAT I HAVE DONE

POS

Designed and developed an efficient Point of Sale (POS) system using HTML, CSS, Bootstrap, jQuery, and C#. The system includes an Account module tailored for seamless transaction management and user-friendly interface. Implemented robust backend functionalities for data processing and integrated responsive design principles for optimal performance across various devices. Contributed to the project by designing intuitive user interfaces, implementing client-side validations, and ensuring smooth communication between frontend and backend components.

SKILLS

JavaScript, ES6, React.JS, Asp.net(MVC), HTML5, JQuery, CSS3, Bootstrap, Asp.net Desktop applications, WordPress, Power BI

Other Skills

Zoom, Github, Google

Meet, Skype

LANGUAGES

English, Urdu

ERP

Led the development of an Enterprise Resource Planning (ERP) system utilizing ASP.NET WinForms for the frontend and C# for backend functionalities. Collaborated with a cross-functional team to design and implement user-friendly interfaces, data management modules, and workflow automation features.

FABRIC

I contributed to the FABRIC project, where my primary responsibility was developing the front-end of the application. The project focused on building an ASP.NET desktop application (Windows application), and my role specifically involved creating a user-friendly and visually appealing front-end interface.

Restaurant-POS

I worked on the Restaurant-POS project, where my primary role was to develop the front-end for the ASP.NET desktop application (Windows application). I was responsible for designing and implementing a user-friendly interface that streamlined the point-of-sale operations for the restaurant.

This project allowed me to apply my expertise in front-end development, ensuring that the system was both efficient and easy to navigate, enhancing the overall user experience for staff handling restaurant transactions
